

Surya C

SOFTWARE ENGINEER | JAVA • PYTHON • FASTAPI • MACHINE LEARNING

+91 7868927511 | suryachandran302001@gmail.com | The Nilgiris, Tamil Nadu | linkedin.com/in/surya-c-968579229

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in Java backend development and Python/FastAPI, building enterprise ERP applications and backend services. Skilled in Java, Python, FastAPI, REST APIs, SQL, React, and machine learning fundamentals including data preprocessing, exploratory data analysis, supervised learning, and model evaluation. Seeking Software Engineer, Python Developer, Backend Engineer, or Junior Machine Learning Engineer opportunities.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, SQL
Backend: FastAPI, REST APIs
Machine Learning: Supervised Learning, Linear Regression, Logistic Regression, Decision Trees, Random Forest, KNN, SVM
ML Data Processing: Pandas, NumPy, EDA, Data Preprocessing, Missing-Value Handling, Outlier Detection, Feature Scaling, Label Encoding, One-Hot Encoding, Train/Test Split
ML Model Evaluation: Cross-Validation, Confusion Matrix, Accuracy, Precision, Recall, F1-Score, ROC-AUC, MAE, MSE, RMSE, R²
Frontend: React.js, HTML, CSS, Bootstrap
Database & Tools: MariaDB, MySQL, PostgreSQL, Git, Linux

PROFESSIONAL EXPERIENCE

Software Engineer <i>Nilgiri Likemind Technologies — TeaMS ERP</i>	<i>Apr 2025 – Present</i>
- Enhanced TeaMS ERP functionality using Java, Python, FastAPI, REST APIs, and SQL across 7 business modules. - Created REST API endpoints supporting workflow integration across 7 ERP business modules. - Maintained backend services for 7 business areas: Production, Inventory, Sales, Payroll, HR, Maintenance, and Finance. - Applied machine learning fundamentals (data preprocessing, EDA, scaling, encoding) to structured datasets of over 50,000+ records, streamlining data preparation pipelines by 40% using Python and scikit-learn. - Developed and evaluated predictive models using Random Forest, SVM, and other algorithms, achieving 88% prediction accuracy and reducing model evaluation time by 25% through optimized hyperparameter tuning. - Collaborated with 4 business teams — Production, Inventory, Sales, and HR — to analyze requirements, troubleshoot issues, and deliver enhancements using Agile/Scrum.	
Software Developer (Backend – Java/ERP) <i>Nilgiri Likemind Technologies — TeaMS ERP</i>	<i>Apr 2024 – Mar 2025</i>
- Maintained and extended TeaMS ERP using Java and REST APIs across 6 core business areas: Production, Inventory, Sales, Payroll, HR, and Finance. - Engineered Java REST services supporting data exchange across 6 core ERP modules. - Optimized complex MariaDB queries, reducing response times by ~30% while supporting 100+ concurrent users. - Created 2 reporting modules for Yield Tracking and Production Monitoring to support operational decisions. - Established role-based access control (RBAC) across 6 core ERP modules to provide secure, permission-based access. - Supported 99.9% reliable ERP operations for 100+ daily active users by refining database-driven business logic and developing over 15 reusable service components, decreasing system downtime by 20%.
